Question/Task	Where: **MTs -** MetaTracts **DVR -** Direct volume rendering	Likert Scale 1 2 3 4 5	Task Solving
Find number of fiber bundles from volume rendering of dataset 1			
Find number of fiber bundles from the color-mapped eigenvector of hessian matrix			
Hessian based visualizations perform better than DVR			
Find number of fiber bundles from MTs fiber bundles			
MTs visualizations perform better than DVR			
MTs 2D slices perform better than 2D slices of original data			
Find largest fiber bundle from set of MTs fiber bundles			
Find smallest fiber bundle from set of MTs fiber bundles			
Find most similar fiber bundle to given fiber bundle using MTs			
MTs better than DVR in finding largest, smallest and similar bundles			Correct Minor mistake Wrong
Meshes generated from MTs give better spatial context than DVR
